

Tableware

Edition 2

LEADING SUPPLIER OF FOOD SERVICE EQUIPMENT IN SOUTH AFRICA & AFRICA

BCE is the leading supplier of kitchen utensils, industrial cookware, commercial kitchens & appliances to the hospitality & food service industries. With years of experience, and an extensive network of dealers and suppliers, we offer the best in food service and catering equipment throughout Southern Africa and beyond.

TABLEWARE

Our tableware ranges surpass the expectations of the hospitality industry, providing our clients with handpicked, world class items on a competitive basis and the assurance created by extensive investment in inventory. This guarantees continuity of supply and professional service levels. We meet the needs of our customers by providing them with complete table top solutions: crockery, cutlery, glassware, placemats and salt and pepper grinders to name a few. We also ensure that our product ranges are suitable for every type of hospitality environment, from high volume franchise operations to five star establishments. We proudly represent a number of world famous brands exclusively within the hospitality industry. Our brands include Churchill, Luzerne, Peugeot, Pintinox, Sola, Bormioli as well as our own house brands.

MACFAB P 162 - 163

CLEANING AND MAINTENANCE

P 164 - 165

"Over 200 years of innovation, passion and expertise make Churchill the natural partner for providing tabletop solutions. Globally recognised as a supplier of the highest quality ceramics, Churchill is respected for service excellence and product innovation. Within an exciting portfolio of products, Churchill has a strong focus on presentation, practicality and performance."

STUNNING TABLEWARE THAT WORKS AS HARD AS YOU DO... GUARANTEED.

The Churchill Super Vitrified body is one of the strongest in the world, delivering presentation that lasts. A comprehensive collection of ranges from classic to contemporary, whiteware to coloured glazes. A variety of shapes and sizes to provide your tabletop solution.

The Churchill Super Vitrified collection offers solutions for chefs that work in fast moving, professionally disciplined back of house environments.

Professionals demand the best performance time and time again – and want products with a proven track record. Churchill Super Vitrified won't let you down.

ENGINEERED FOR PERFORMANCE

SUPERIOR STACKABILITY
Designed with safe slacking in mind to maximise space saving in a back of house environment.

SUPERIOR GLAZE FINISH

Protected by ecoglaze, a high performance glaze that enhances product performance, prolonging the life of the product, improving stain and metal mark resistance and durability. Excellent stability prevents thermal shock and crazing.

ecoglaze

SUPER VITRIFIED BODY

Super Vitrified is a vitreous body that does not absorb moisture, is more hygienic and has better heat retention properties. Its high resistance to thermal shock helps to reduce breakages. Its properties provide superior strength.

QUALITY

Super Vitrified meets the quality standard for food service tableware laid down by the British Standards Institute, BS 8654.

BS 8654

BS 4034

UP TO 20% LIGHTER*

Refined thinner profiles with a defined rim edge dramatically reduce the weight of each item. Easy to handle and applies to items on a profile body shown opposite.

*Excludes footed plates.

IMPROVED FACE PROFILE*

A defined rim edge to improve food presentation.

*Relates to items on a Profile body.

FOOTED PLATES

Key plate sizes have a foot essential for banqueting, available in certain ranges only in CSV.

MICROWAVE & DISHWASHER SAFE

High thermal shock and tested to withstand 5000 dishwasher cycles.

FULLY GLAZED FOOT ON PLATES & ON CERTAIN OTHER CSV LINES*

Prevents damage to ware when stacked.

*Excludes footed plates

DURABILITY & STRENGTH

A reinforced "rolled edge" increases chip resistance.

KINTSUGI RANGE

The Kintsugi design is a modern interpretation of the Japanese art of repairing broken pottery. The intricate crackled design features a subtle, reactive texture that makes each piece unique. The design is decorated underglaze, creating a protective layer for added durability.

BOWL - 18.2CM (12)

AGANO RANGE

The Agano design is a distinctive range addition to the Studio Prints collection, ideal for food presentation, the linear radial pattern draws the eye to the centre of the plate. Studio Prints Agano is a versatile, abstract design that enhances the dining experience across all manner of food styles and hospitality settings.

Manufactured in the UK using Churchill's innovative print process, the print is positioned directly under the glaze. This creates a protective layer over the decoration and has all the durability and technical reassurance required for the hospitality environment.

Inspired by the traditional glazing process known as Raku firing which creates expressive and exciting results. Raku showcases reactive texture through print. Raku inspired prints are achieved with Churchill's innovative print process. Each piece is unique as the reactive print acquires its beautiful colour through random, spontaneous effects. Emulating an artisan glaze finish, Studio Prints Raku has all of the durability and technical reassurance required for the hospitality environment.

"THE PASSION FOR PERFECTION IS EVIDENT IN THIS RANGE"

It's been 70 years of creating fine china for the world's top food, hospitality, retail and aviation brands. Luzerne is proudly made in Dehua, China - the birthplace of world-renowned Blanc de Chine and World Ceramics Capital, but remains a Singaporean brand resolutely committed to quality and our customers.

Our revolutionary bone ash free products are a testament to our environmentally friendly and culturally aware philosophy.

From award-winning establishments to the home, Luzerne brings handcrafted expertise to your table. We are committed to your everyday best, because we believe that the everyday can be amazing. It's why we make premium tableware accessible, and why our service partners in over 50 countries around the world guarantee support at all times.

As part of a commitment to long-lasting quality and reliability, every Luzerne product is held to the highest standards. Since 2004, Luzerne has adopted the national standard of Criteria for Performance Excellence (GB/T19580-2004) to this end. We are also proud to be certified and approved by ISO 9001 & ISO 14001.

CUTLERY AND SERVING UTENSILS

"CHOOSE FROM MANY DESIGNS"

We offer a range of the finest cutlery shapes, from simple to ornate, traditional to contemporary, along with speciality items such as serving gear and steak knives in either 18/10 or 18/0 stainless steel.

18/10 stainless steel contains 18% chrome and 10% nickel whilst 18/0 contains 18% chrome with no nickel. Therefore 18/10 provides greater protection against corrosion, scratching and assists with longer lasting brilliance and shine.

BORMIOLI ROCCO GLASSWARE

Founded in 1825 in Fidenza Italy, Bormioli Rocco has become a reference for the tableware glass industry in international markets. With centuries of experience, the company has great knowledge of glass technologies and creates its products by different production processes and materials.

Bormioli Rocco brings to the world over the Italian way of experiencing the table, through products with continuously evolving design, always in line with contemporary living styles. The product ranges cater for all occasions and are varied and comprehensive, satisfying all the needs of the most demanding foodservice professionals.

INSPIRATIONAL • UNIQUE

BORMIOLI ROCCO GLASSWARE

- Our Crystal Range is made from superior lead-free crystal glass and encompasses strength, clarity, shine and innovation.
- The Standard Range is comprehensive and its versatile shapes are designed with emphasis on functionality and practicality.
- The Toughened Range is unsurpassed in strength and functionality. The manufacturing process employed renders it safer than ordinary glass and, in addition, tempered glass is also 2.5 times more resilient to thermal shock than ordinary glass.

A - LASER CUTTING

For thin rims that enhance the perception of wine qualities and elevate the tasting experience.

B - REDUCED THICKNESS

Excellent distribution of glass around the rim and along the sides.

C - STAR GLASS

Bormioli Rocco's innovative and exclusive chemical composition that produces an ultra-clear, highly transparent glass.

D - PULLED STEM

A particular process whereby the stem is pulled from the same gob of molten glass as the bowl ensures elegant shapes, ultra-high strength and flexibility.

E - XLT

The exclusive reinforcing treatment that strengthens the stem and protects it over time.

STACKABILITY

Space saver shapes designed to economise on storage and transport.

TEMPERED GLASS

High resistance to thermal shock, impact and machine washing cycles. The exclusive reinforcing treatment that strengthens the stem and protects it over time.

SOMMELIER ITALIAN ASSOCIATION

In partnership with Italian Association of Sommeliers.

DNA COLOR PROJECT - FULL MASS COLOR TECHNOLOGY

The colours are 100% dishwasher safe in industrial dishwashers and Eco-friendly. The material is chip-proof and retains all the typical characteristics of glass (brilliance, transparency, recyclability and hygiene) for the entire life cycle of the product.

SALT AND PEPPER MILLS

"THE NAME IN SALT AND PEPPER MILLS WORLDWIDE"

Peugeot's history begins in the 19th century with the manufacturing of items such as pepper and coffee grinders. More than 160 years later, Peugeot grinders are still manufactured in France and continue setting the standard in the kitchens of the greatest chefs around the world. The Peugeot mechanism has a lifetime limited guarantee and is available in a multitude of shapes, sizes and colours, in different wood and acrylic finishes.

Settle only for the best – the pinnacle in style, tradition, reliability and quality.

WHICH SALT TO USE ?

To get the best out of your Peugeot salt grinding mechanism, you should use dry salt with a diameter of 4mm.

WHICH PEPPER TO USE ?

To get the best out of your Peugeot pepper grinding mechanism, we recommend you to use dry peppercorns with a diameter of 6 mm or less.

macFAB

MACFAB PLACEMATS

The hospitality industry continues to turn to macFAB for innovative and ground breaking products, which help reduce both energy and laundry costs while combining sophisticated textures and finishes with durability and ease of maintenance. macFAB tablemats are made from spun polyester yarn coated with waterproof PVC to create a beautiful, highly functional item for the hospitality industry. It is stain resistant, ultra strong and easy to clean. Mats are suitable for both indoor and outdoor use, as the material is UV protected for life.

**Other patterns and finishes are available on request

CLEANING AND MAINTENANCE

CROCKERY

DETERGENTS

Choosing the correct detergent is important. High alkaline content will eventually damage the glaze surface. Always follow the manufacturer's instructions and do not use more than the recommended quantities.

TEMPERATURE

A wash temperature of 60°C is generally optimal for achieving the correct balance between ensuring the effective removal of food particles and maximizing the longevity of the glaze.

HANDLING

Do not use metal utensils, scrapers, abrasive pads and powders or bleach for removing food particles. Only borax or gentle, non-abrasive household cleaners should be used to remove stains. Metal markings can be avoided by placing tableware on plastic or rubber mats.

DISHWASHERS

Avoid any vibration of plates against each other through proper loading and through the use of plastic coated racks and baskets. Ensure that the manufacturer's instructions are followed. Wash cutlery in separate baskets to prevent metal markings on the crockery.

ROTATION

Rotating the tableware in use promotes even wear and tear. Ensure that there is enough stock in operation to prevent excessive use and premature deterioration.

THERMAL SHOCK

Ceramic tableware is not designed to withstand excessive thermal shock conditions e.g. from the freezer to the hot oven. Do not expose tableware to a naked flame or heated electric element.

MICROWAVES

Ceramic tableware with metallic decorations such as gold or silver are not suitable for microwave ovens.

GLASSWARE

CLEANING

Glassware should be cleaned immediately after use to avoid stubborn residues. Wash glassware in hot water and rinse with cold water. Crystal glass should be washed in lukewarm water. Scrub glassware thoroughly with a brush ensuring that all surfaces are covered. Do not use any harsh cleaning utensils such as a steel wool pad to wash glassware as this will cause scratches.

DETERGENTS

For stubborn stains, use a mild detergent only. Always follow the manufacturer's instructions and do not use more than the recommended quantities. After using a detergent, ensure that glassware is rinsed thoroughly to avoid any detergent residues being left on the glass.

DISHWASHERS

Glassware can be washed in the dishwasher. However, take care not to wash glasses with very delicate long stems in the dishwasher as the possibility exists that these may break.

ROTATION

Avoid using scratched, cracked or chipped glasses.

STACKING

Avoid stacking glassware unless it is specifically identified as stackable. For best results store glasses in appropriate crates.

MICROWAVES

Never allow glassware to be placed inside a microwave oven.

THERMAL SHOCK

Do not expose glassware to an open element or electric plate and do not place in the oven. Normal glass can withstand temperature changes of 42°C, and tempered glass can withstand temperature changes of 130°C.

CLEANING AND MAINTENANCE

CUTLERY

CLEANING

Wash cutlery in hot soapy water as soon as possible after use. Rinse immediately with hot water and wipe cutlery with a dry, clean cloth immediately. Never leave dirty cutlery to soak and never leave cutlery damp, especially 18/0 stainless steel grade.

DETERGENTS

Use only pH neutral or slightly alkaline detergents. Don't use products containing hypochlorides (bleach) or silver dip. Always follow the manufacturer's instructions and do not use more than the recommended quantities.

DISHWASHERS

Do not mix stainless steel or silver plate in the same load. Ensure that the manufacturer's instructions are followed and do not allow cutlery to stand in the dishwasher after the cycle is completed. Cutlery must be dried with a clean cloth.

POLISHING

Stainless steel cutlery will perform better if it is polished from time to time with a recommended stainless steel polish.

SALT AND PEPPER MILLS

CLEANING

Clean the body of the mill with a soft dry cloth and if necessary, inside with a small soft brush. Do not put the mill in the dishwasher. Never immerse the mill in water as this will cause rust to appear underneath/inside the unit. This can also lead to paint cracking/swelling in the case of wooden units. If the mill is not intended for use for a lengthy period, remove the contents.

STORAGE

Store the mill in a cool, dry place where they are unlikely to be damaged or knocked to the floor. Keep the mill away from being too close to the stove or open flame. Avoid exposing the mills outside in coastal areas that are right near the sea during the night or early morning.

OPERATING THE MILL

It is important to fully comprehend that these mills are hand-operated and as a result, require the following measures in order to ensure proper functioning:

- The top nut must not be too tight or too loose. It needs to be just firm.
- The top nut will need constant adjusting to the just firm position when milling.
- The top of the mill can be rotated in both directions or in one direction only.
- Don't mill directly over saucepans, casseroles or frying pans during cooking. The steam can dampen the salt/pepper, which in turn can clog the mechanism.

REFILLING

Adherence is crucial and any deviation leads to most of the complaints received about the mills not functioning properly. Please take note when purchasing the mill as it is filled with the relevant salt/pepper, the purpose of which is to instruct on the type of replacements required. Only dry salt (not wet) must be used and the same for pepper (not oil-based). Non-compliance will result in corrosion and clogging of the mill. The sizes must conform to the original size in the mill i.e. salt granule 4mm and pepper corn 6mm or less. Wrong sizes will not be grinded as there is no traction taking place. Do not put pepper corns into the salt mill and vice versa. The grinding mechanisms are different and fit for purpose. Wrong application will result in corrosion/clogging.

In cases where the top nut is identified with either a P (for pepper) or S (for salt), please ensure that these are placed correctly on the relevant mill. These mills are salt and pepper mills only. Do not insert other spices and herbs.

MACFAB PLACEMATS

CLEANING

Placemats are easily cleaned with soap and water. Should a stubborn stain occur, the woven polyvinyl can withstand gentle rubbing with hot soapy water or a bleach-based detergent.

DISHWASHERS

Do not put placemats into the dishwasher.

SANITIZING

A high temperature sanitizer can be used once a week to ensure that the placemats remain hygienic. This product cannot be ironed since it is made of vinyl.

STORAGE

Store placemats flat or neatly rolled up. Do not allow them to be folded or allow them to crease.
